TEACHING
AI ETHICS

BIAS
AI data can lead to biased, discriminatory output.

1

ENVIRONMENT
AI technology impacts environment through mining, energy consumption and waste

2

TRUTH
AI raises concerns of plagiarism, cheating, and fake news

3

COPYRIGHT
AI can breach copyright laws and infringe intellectual property rights

4

PRIVACY
AI raises concerns about personal data collection and surveillance

5

DATAFICATION
AI raises concerns about data privacy and exploitation. Every part of our lives is data.

6

AFFECT RECOGNITION
AI emotion detection raises concerns about accuracy, privacy, and discrimination

7

HUMAN LABOUR
AI automation raises concerns about job automation and exploitation

8

POWER
AI reinforces global power imbalances and structural inequalities
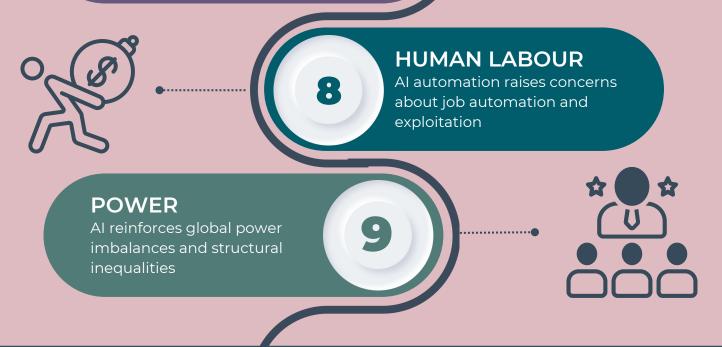

9

KEY QUESTION

Can we build ethical guidelines to address these concerns?
